

Welcome to the Willow Room

**Week of
October 10th**

Reminders:

* Literature Circle homework is due Thursday, October 20th. The students will need to perform the role of "Summarizer."

* ADD Math will be going home today. Half of ADD Math is due on Monday. The students will then have their work plan time to finish the other half.

* Uniform Buy-out Day is Thursday, October 21st. Students may pay \$2 to wear their regular clothes.

* Spelling test on Lesson 3 is on Friday, October 21st.

* Multiplication Quiz on 3's is on Friday, October 21st. Please help your child study this week. Computer games, flash cards, quizzing them on the way to school are some great ways help them practice!

Willow Students Study the Moon

This past week, the students have learned about the moon. They were shown a hands-on demonstration on the moon phases and created a 3-D model depicting the phases. In addition, they will be coming home today with a "Moon Phase Investigation Journal." In this journal, they will need to record/draw the moon phase every day in their journal for a month. Please help your child to remember!

MEAP

Next week, the students will be taking the MEAP on Tuesday and Wednesday. Because of the MEAP schedule this past week and next week, both the spelling test and multiplication test (on 3's) are rescheduled for Friday, October 21st. Oh, and students will start Wordly Wise the week of the 24th!

Solar System Research

The students have been busy researching an object in the solar system. Posted outside our classroom are the final pieces: students wrote a two paragraph essay and drew a picture on their topic. The students were very proud of their work. Here is a picture of some of the final pieces.
